De La Thanh - Hanoi

ABOUT ME

Digital marketer with hands-on experience across both B2C and B2B environments, covering annual and campaign planning, paid media, analytics, tracking, SEO, content, CRM, e-commerce and CRO.

My background has been built through end-to-end execution rather than focusing on a single channel. I have worked on campaign planning and optimization, customer journeys, advertising, landing pages, lead nurturing, reporting, and close collaboration with Sales Team to improve conversion and business outcomes.

I focus on building measurable growth systems end to end – from audience, messaging and budget allocation to GA4/GTM/Pixel tracking, lead quality, Sales conversion, pipeline and revenue.

My long-term goal is to become a Digital Marketing Director who can contribute not only to marketing performance, but also to revenue growth and broader business development.

WORK & EXPERIENCE

2025 - PRESENT

DIGITAL MARKETING EXECUTIVE

CMC Manufacturing and Services Co., Ltd. (CMS) – CMC Corporation

B2B Digital Growth & Demand Generation – Enterprise IT, DaaS & Collaboration Solutions

- Owned annual and quarterly Digital Marketing planning, translating Head/Business Unit priorities into market, customer and competitor research, campaign positioning, creative direction, channel mix, KPI targets and min/max budget scenarios across multiple products, solutions and customer segments; adapted plans throughout the year based on commercial priorities and campaign performance.
- Managed approximately VND 520M in annual Digital Marketing budget across Meta, Google, LinkedIn, email tools and supporting digital activations, with responsibility for channel allocation and budget reallocation based on audience fit, media efficiency, lead quality and downstream Sales outcomes; delivered approximately VND 1.12B in realized digital-sourced revenue, VND 6.17B in opportunity value and VND 5.06B in active pipeline, maintaining an approximately 2.16x realized revenue-to-spend ratio.
- Delivered a priority Q4 full-funnel B2B acquisition program under a ~VND 252M media budget, generating 282 Leads => 210 Qualified Leads => 122 SQLs => 38 Opportunities => 15 Orders, with a 74.5% lead qualification rate, 31.1% SQL-to-opportunity conversion and 39.5% opportunity-to-order conversion; worked with Sales to validate lead quality and improve handoff across funnel stages.
- Led Meta Ads as the primary paid acquisition channel, applying A/B testing across audiences, creatives and budget variants; achieved approximately VND 894K CPL, 74.5% lead qualification and ~VND 1.93M realized revenue per acquired lead, using CPL, frequency, creative performance, lead quality and downstream Sales conversion to guide scaling, reallocation and kill decisions rather than optimizing to media metrics alone.
- Optimized Google Search campaigns through search-term mining, negative keyword expansion, conversion-keyword identification and match-type refinement, achieving 6.66% CTR and VND 735 average CPC; extended acquisition to LinkedIn Ads for FDI and enterprise audiences where Meta targeting was less precise, aligning channel selection with buying intent, audience accessibility and account quality.
- Implemented and maintained hands-on measurement and ad-tech operations across GA4, Google Tag Manager, Meta Pixel/CAPI, Google Search Console, Looker Studio, UTM and conversion events, while managing Meta Business assets, ad-account structures, business verification, domains and remarketing/Lookalike audiences; consolidated reporting from weekly campaign monitoring to monthly funnel and revenue reconciliation, improving visibility from source and campaign through SQL, opportunity and won revenue.
- Owned campaign messaging and digital assets across Facebook, LinkedIn, email, websites, landing pages, video, brochures/proposals, sales kits, webinars and industry events; managed corporate and satellite websites across content, on-page/off-page SEO, UX and CRO, achieving Top 1–5 rankings for strategic keywords while coordinating execution with Sales, Product/Technical, Design, BUs and external partners through lead handoff and post-event nurturing.
- Built both Shopee and WordPress commerce channels from zero. Scaled Shopee to ~3K followers, 120 orders, ~2.7% CVR and VND 667K AOV, generating ~VND 80M revenue from ~VND 30M in Shopee Ads; the transactional WordPress site generated 36 orders and ~VND 20M revenue, including an initial ~2.5x ROAS Facebook Ads test with GA4/GTM/Meta Pixel tracking.

CORE SKILLS

PAID MEDIA

Meta Ads · Google Ads · LinkedIn Ads · Shopee Ads · Media Planning · Budget Management · A/B Testing

ANALYTICS

GA4 · Google Tag Manager · Meta Pixel/CAPI · GSC · Looker Studio · UTM · Conversion Tracking

WORK & EXPERIENCE

NP EDUCATION
Marketing Leader

2023 - 2024

B2C Growth, Brand & Enrollment Marketing — Education

- Built and owned the annual integrated Marketing plan from company revenue, profitability and enrollment targets, translating business objectives into channel strategy, campaign calendars, KPI targets, budgets, resource allocation and contingency scenarios; adjusted execution by recruitment season, center performance and changing business priorities.
- Managed approximately VND 320M in annual paid media, primarily across Meta/Facebook Ads, with peak investment of approximately VND 80M/month during two major recruitment months; allocated and reallocated spend across lead-generation, conversion, engagement and brand-building campaigns using CPL, lead quality, enrollment performance and Admissions feedback.
- Led an 8-member Marketing team across three education centers, assigning weekly priorities and deadlines, conducting monthly KPI/performance and incentive reviews, and running rotating weekly skill-training sessions to strengthen execution quality and cross-functional capability across Content, Design, Video and Performance.
- Consistently generated 500+ MQLs per month and reached approximately 1,500 leads during peak recruitment periods, managing acquisition beyond media delivery through lead quality, funnel performance and Admissions coordination to improve downstream conversion rather than optimizing purely for lead volume.
- Improved lead-to-enrollment conversion from approximately 20% to 50% by identifying funnel bottlenecks and optimizing audience targeting, creative, messaging, website/landing-page journeys, consultation flow and Marketing–Admissions handoff across key enrollment campaigns.
- Built an organic TikTok channel from zero to 1,000+ followers and 5,000+ cumulative likes within six months through approximately 30 short-form videos, recurring content series and trend-jacking; co-developed concepts, approved scripts, trained filming execution and coordinated Content, Design and Video Editing through final production, with the channel focused primarily on student brand affinity.
- Drove approximately 300% growth in tracked brand awareness and 100% growth in organic reach, while building an owned social ecosystem of 21K+ followers and members across Facebook Page (17K+ followers), Zalo OA (3K+ followers) and a private Facebook Group (1K+ members), reducing reliance on paid acquisition alone.
- Planned and executed online/offline recruitment, community and activation programs attracting 200–300+ participants per event, connecting promotion with digital registration, lead capture, consultation, Sales/Admissions follow-up and post-event nurturing to support both brand engagement and enrollment objectives.

UNIREALCHAIN
Online Marketing Specialist | 2022 – 2023

Blockchain / FinTech

- Supported digital growth across community, content distribution and online acquisition for an international-facing blockchain/FinTech ecosystem.
- Helped build and engage a 10,000+ investor community.
- Coordinated outreach and campaign amplification with 200+ global influencers/KOLs.
- Worked in a fast-moving market where audience sentiment, timing and communication directly influenced acquisition and engagement.

FOXCONN
Learning & Development Specialist | 2018 – 2021

Manufacturing / Corporate L&D

- Supported corporate learning and employee-development programs within a large-scale manufacturing environment.
- Developed and maintained e-learning and training content to support standardized internal knowledge delivery.
- Used Power BI dashboards and reporting to track training activities and improve management visibility.
- Built early experience in corporate operations, cross-functional coordination, data reporting and structured enterprise processes.

EDUCATION

2014–2018
BACHELOR OF
BUSINESS ADMINISTRATION
Foreign Trade University
— Advanced Program
GPA: 3.45/4.00 - Very Good

During university, I completed six research projects across Sales & Marketing, Human Resources, Business Strategy, Project Management and Entrepreneurship, giving me an early foundation in approaching business problems through research, analysis and structured thinking.
