De La Thanh - Hanoi

ABOUT ME

Digital marketer with hands-on experience across both B2C and B2B environments, covering paid media, content, CRM, SEO, analytics, and lead generation.

My background has been built through end-to-end execution rather than focusing on a single channel. I have worked on campaign planning and optimization, customer journeys, advertising, landing pages, lead nurturing, reporting, and close collaboration with Sales Team to improve conversion and business outcomes.

Today, I focus on connecting digital channels into one measurable growth system – from acquisition & engagement to lead generation, qualification, pipeline, and revenue.

My long-term goal is to become a Digital Marketing Director who can contribute not only to marketing performance, but also to revenue growth and broader business development.

CORE SKILLS

PAID MEDIA

Meta Ads · Google Ads · LinkedIn Ads

CONTENT

Strategy · Branding · Copy Writing

SOCIAL MEDIA

Community Growth · Design · Video Making

SEO & AEO/GEO

SEO · Keyword Research · AI Search Visibility

CRM & CRO

Email MKT · Landing Pages · Lead Nurturing

INSIGHTS

Market Research · Funnel Analysis · Reporting

LEADERSHIP

Team Management · Decision Making

LANGUAGE

ENGLISH (90%)
Perfect Reading / Speaking / Listening

WORK & EXPERIENCE

2025 - PRESENT
DIGITAL MARKETING EXECUTIVE
CMC Manufacturing and Services Co., Ltd.

B2B Digital Growth & Demand Generation – Enterprise IT, DaaS & Collaboration Solutions

Managed integrated B2B marketing across digital acquisition, content, events, market research and Sales enablement for enterprise technology solutions, connecting campaign execution with measurable lead, pipeline and revenue outcomes.

- Managed VND 252M in paid media spend across Meta and Google, generating VND 543.73M in realized digital-sourced revenue and building a VND 2.99B opportunity portfolio, with approximately VND 2.45B remaining in active pipeline. Realized revenue alone delivered a 2.16x blended ROAS.
- Built and operated the full B2B acquisition funnel from digital touchpoint to Sales conversion: 282 Leads => 210 Qualified Leads => 122 SQLs 38 Opportunities => 15 Orders, achieving a 74.5% lead qualification rate, 31.1% SQL-to-opportunity conversion, and 39.5% opportunity-to-order conversion.
- Developed a Champion–Challenger testing and scaling framework for Meta Ads, preserving proven campaigns as controls while testing audience, creative and budget variants separately; used CTR, CPL, frequency and downstream lead quality to guide scaling, optimization and kill decisions.
- Optimized Google Search campaigns through search-term mining, negative keyword expansion, conversion-keyword identification and match-type refinement, achieving 6.66% CTR, VND 735 average CPC and approximately VND 218K per tracked call-click conversion.
- Planned and coordinated B2B webinars, partner workshops, industry events and exhibitions, connecting offline activities with digital acquisition through paid media, social content, email, landing pages, registration flows, lead capture and post-event nurturing.
- Conducted market, competitor and customer research to identify target segments, demand triggers, pain points, use cases and buying barriers; translated findings into campaign positioning, media targeting, content angles, landing-page messaging and sales materials.
- Worked cross-functionally with Design, Media, Sales, Business Units, Product/Technical teams and external partners to translate business priorities into campaign assets across ads, social media, video, landing pages, email, event materials and sales enablement content.
- Built the company's marketing measurement and lead-management framework end-to-end, connecting Source => Campaign => Lead => MQL => SQL => Opportunity => Won/Revenue, while consolidating Ads, Lead, Content, SEO, Social and AI-search data into a unified reporting structure.
- Improved reporting from approximately weekly data availability to daily performance visibility, while maintaining weekly performance reviews and monthly opportunity/revenue reconciliation with Sales and business units.
- Established a closed-loop Marketing–Sales workflow, using lead-quality and opportunity feedback to refine targeting, messaging, content priorities and channel allocation, including expansion into LinkedIn Ads for more precise FDI and enterprise account targeting.

WORK & EXPERIENCE

NP EDUCATION

Marketing Leader

2023 - 2024

B2C Growth & Enrollment Marketing – Education

Led multi-center B2C marketing across paid acquisition, content, community, website/landing pages and recruitment events, with direct responsibility for lead generation, enrollment conversion and coordination between Marketing and Admissions.

- Led an 8-member Marketing team across 3 education centers, overseeing Paid Media, Content, Social, Website/Landing Pages, Community and Events while aligning closely with Admissions/Sales on lead quality and enrollment targets.
- Managed up to VND 80M in monthly advertising budget, consistently generating 500+ MQLs per month and reaching a peak of approximately 1,500 leads during major recruitment periods.
- Managed the acquisition funnel beyond media delivery, reviewing lead volume, lead quality, conversion performance and Admissions feedback to identify issues across targeting, creative, messaging, landing pages and follow-up.
- Improved the lead-to-enrollment conversion process from approximately 20% to 50% by identifying funnel bottlenecks and tightening coordination between Marketing and Admissions on lead quality and follow-up.
- Planned integrated recruitment campaigns across Paid Media, Content, Social, Community, Website/Landing Pages and Events, ensuring all channels supported the same enrollment objective.
- Continuously tested audiences, creatives, content angles, offers and conversion journeys, balancing acquisition volume with downstream enrollment quality rather than optimizing only for low CPL.
- Drove approximately 300% growth in tracked brand awareness and 100% growth in organic reach through coordinated paid, organic, social and community initiatives.
- Built and grew an education-focused community to 20,000+ members, supporting organic reach, ongoing engagement and prospective student acquisition beyond paid advertising.
- Planned and executed online/offline recruitment and activation programs attracting 200–300+ participants, connecting promotion with digital registration, lead capture and post-event follow-up.
- Worked cross-functionally with Content, Design, Admissions/Sales and center stakeholders to translate recruitment priorities into campaign assets, landing pages, event communications and conversion-focused messaging.

UNIREALCHAIN

Online Marketing Specialist | 2022 – 2023

Blockchain / FinTech

- Supported digital growth across community, content distribution and online acquisition for an international-facing blockchain/FinTech ecosystem.
- Helped build and engage a 10,000+ investor community.
- Coordinated outreach and campaign amplification with 200+ global influencers/KOLs.
- Worked in a fast-moving market where audience sentiment, timing and communication directly influenced acquisition and engagement.

FOXCONN

Learning & Development Specialist | 2018 – 2021

Manufacturing / Corporate L&D

- Supported corporate learning and employee-development programs within a large-scale manufacturing environment.
- Developed and maintained e-learning and training content to support standardized internal knowledge delivery.
- Used Power BI dashboards and reporting to track training activities and improve management visibility.
- Built early experience in corporate operations, cross-functional coordination, data reporting and structured enterprise processes.

EDUCATION

2014–2018

BACHELOR OF BUSINESS ADMINISTRATION

Foreign Trade University

– Advanced Program

GPA: 3.45/4.00 · Very Good

During university, I completed six research projects across Sales & Marketing, Human Resources, Business Strategy, Project Management and Entrepreneurship, giving me an early foundation in approaching business problems through research, analysis and structured thinking.
